## DIGITAL DATELINE

“BUILD IT LIKE WE OWN IT”

### GM ORION TEAM, SUPPLIERS, CONTRACTORS AND VISITORS:

We have a problem with behavior in our restrooms. This should come as no surprise to anyone as the number of times backups and restroom closures throughout the plant have increased significantly over the last few days. Since this last weekend, there have been as many as 10 backups caused by individuals flushing items they shouldn't.

I want to be clear that it is unacceptable to flush anything besides toilet paper and single seat liners down the toilets. Paper towels, trash bags, feminine hygiene products, bottles, bottle caps and anything else clogs the pipes and causes us to close them for repairs, preventing you from being able to use the restrooms in your respective areas.

Each time a restroom is backed up, the cost to clear the pipes is upwards of \$4,000. That's money spent on contractors instead of the plant. Our facilities team, represented and non-represented, works hard to clean and maintain our restrooms. When something like this happens, the additional strain falls on them.

I ask that everyone please consider the impact caused by the choices we make when we come to work. We have an opportunity to transform Orion Assembly into a completely reimagined workplace – please think “It's On Me” and help be a part of this transformation by taking care of the facilities we have in the meantime. Please also be vigilant and alert the facilities team of any abnormal conditions you see so they can be cleared up as soon as possible.

### If you see something, say something.

If you become aware or witness instances of someone damaging company property:

- Talk to your Group Leader (or other members of Plant Management)
- Talk to HR/LR
- Talk to your UAW representative who will bring your concerns to the attention of management
- Contact the **AwareLine: 1-800-244-3460** or [www.awareline.com](http://www.awareline.com)

If someone is found to be purposefully damaging company property and/or misappropriating supplies, we will take formal disciplinary action up to and including discharge and recovery of costs to repair the facility.

Thanks for your attention and action.

**Jim Quick**

Plant Executive Director

Orion Assembly
